

Android Shortcuts

FLOATING SHUTTER BUTTON FOR CAMERA

You may like this feature to help you take photos on your phone with more ease.

Here is how to do it:

1. Open the default camera of your android phone.
2. In the top left corner there is the "Settings" icon, click on it.
3. Scroll down and select "Shooting Methods".
4. Switch ON the "Floating Shutter Button".

Now you have a floating shutter button on your default android phone camera.
