

iPHONE HACK: PARENTAL CONTROLS

This hack is great for parents who give their kids phones to play with but don't want them to be able to open other apps while using the phone.

1. Go to settings.
2. Go to accessibility.
3. Go to guided access.
4. Toggle guided access on.
5. Also make sure accessibility shortcut is toggled too.
Click the toggle on and it will go green.
6. Set a passcode that your child won't guess.
7. Open the app they they are allowed to use.
8. Triple click the side button - they now can't leave the app.
9. To turn off the lock triple click the side button and enter the passcode you chose and it is now turned off.
